11. Communication
12. Meeting the needs of all children
13. Safer eating
14. Monitoring and review

Statement of intent

At **Aintree Davenhill Primary School**, we understand that the early years are a crucial time in a child's development and are aware that what children eat and drink and the habits they develop during this phase can impact their future health.

We value the importance of the EYFS in providing children with a nutritious, balanced diet that will encourage them to make healthy, informed choices. We work collaboratively with parents to promote healthy eating, identify health issues and highlight the risks of unhealthy eating practices.

We believe that food can be used in a variety of educational ways. Children are encouraged to celebrate holidays, religious festivals, special events and the various foods associated with these events and are encouraged to experiment with unfamiliar foods.

Aintree Davenhill Primary School meets all statutory food safety and nutrition requirements for educational settings in England' and aims to maintain these standards across all meals provided.

1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Public Health England 'Example menus for early years settings in England'
- DfE 'School food in England'
- DfE 'The school food plan'
- DfE 'Statutory framework for the early years foundation stage'
- Food Safety Act 1990
- The Requirements for School Food Regulations 2014
- The Food Information (Amendment) (England) Regulations 2019 (also known as Natasha's Law)
- DfE 'Early Years Foundation Stage nutrition guidance'

This policy operates in conjunction with the following school policies:

- Allergen and Anaphylaxis Policy
- Health and Safety Policy
- Complaints Procedures Policy
- Early Years Policy
- Packed Lunch Policy

2. Roles and responsibilities

The governing board is responsible for:

- The overall implementation of this policy.
- Ensuring that this policy does not discriminate on any grounds, including, but not limited to, ethnicity/national origin, culture or religion.
- Handling complaints regarding this policy, as outlined in the setting's Complaints Procedures Policy.
- Ensuring the school uses reliable suppliers for the food purchased.
- Informing parents who provide food for their children about the storage facilities available in the setting.

The EYFS & KS1 Assistant Head, in conjunction with the Headteacher, is responsible for:

- The day-to-day implementation and management of this policy.
- Reviewing menus to ensure children's needs are being met.

- Ensuring equipment is suitable for its use and providing separate facilities for handwashing and for washing up in the kitchen area.
- Ensuring all staff are allergy trained.
- Ensuring that at least one member of staff with a valid paediatric first aid certificate is in the room when children are eating.
- Ensuring food is prepared in accordance with choking prevention guidance.
- Ensuring parents are given adequate notice of any changes to meals, food choices or any other aspect of food provision.

Early years staff are responsible for:

- Being advocates of healthy eating.
- Discouraging children from sharing or swapping their food in order to protect those with food allergies.
- Treating all children equally, taking account of the eating practices in their cultures.
- Checking allergy and dietary information before providing food.
- Remaining alert to signs of choking or allergic reactions.
- Responding immediately to incidents in line with first aid and allergy training.
- Ensuring children are seated safely and that mealtime distractions are minimised.
- Recording details of any choking or allergy-related incidents and sharing them with parents, the Headteacher and the EYFS & KS1 Assistant Head.

Parents are responsible for:

- Providing the setting with information on their child's dietary requirements, preferences and food allergies.
- Providing specialist food for their child, where they may have an allergy, intolerance or medical need.

3. Food and drink served

All meals, at lunchtime, will include a variety of foods from the four main food groups:

- Fruits and vegetables
- Starchy carbohydrates
- Dairy and plain, fortified plant-based alternatives
- Proteins

Foods that are high in fat, salt and sugar will be limited in line with guidance for the age group of the children concerned.

Portion sizes will be based upon the recommended intake for the age group of the children concerned.

Menus will reflect the diversity of the community, with a variety of flavours and textures.

Fridges and store cupboards will be cleaned regularly to ensure they are clean. Food stored in the fridge will be kept at 5°C or lower and, where necessary, reheated until piping hot throughout. Food will be stored in sealed plastic containers, and tin cans will never be stored in the fridge.

School meal menus will rotate on a three-week cycle.

Fresh drinking water will be available and accessible at all times and children will be encouraged to drink regularly.

Milk will be served with either the morning or afternoon snack (children attending part-time will always be offered milk with their snack). Milk is provided to all children in Nursery and Reception.

Milk or water will be the only drinks offered to children by the setting during the day. At lunchtime, the children are able to have a drink of juice. Children may also have other drinks on specific days, e.g. party/disco days.

Staff will not consume carbonated drinks in the presence of children.

4. Nutrition

The setting understands that the early years are a crucial time to reduce health inequalities and set the foundations for a lifetime of good health. Staff will ensure that food items prepared and consumed on the premises comply with statutory guidelines and are healthy, balanced and nutritious.

Staff will encourage children to eat a balanced diet which contains a wide variety of foods, planning snacks that include a variety of food and drinks from the four main food groups every day.

In doing so the setting will follow the DfE's advice regarding:

- The food and drink that should be provided, limited or avoided.
- Portion sizes

5. Eating environment

The eating environment will be comfortable and relaxed. Children will be encouraged to develop their independence when eating.

Children will be observed to ensure they are drinking and eating enough, and staff will be aware of the behaviour that may suggest a child is thirsty or hungry.

Children will be encouraged to develop good eating skills and table manners.

Meals times will be used to help children *develop* independence, through making food choices and feeding themselves.

6. Celebrations and special occasions

School requests that parents do not allow their child to bring in food items such as sweets and cakes to share with their peers.

The setting will, instead, celebrate with activities such as the following:

- Craft activities
- Songs and stories
- Dressing up
- Decorating rooms
- Playing special games
- Encouraging children to find out about a wide range of events from a variety of cultures

7. Allergies and special requirements

School understands that food allergies can be life threatening conditions for some children and will ensure they are taken very seriously.

As part of the school's ongoing CPD for early years practitioners, staff will be trained to understand:

- The common allergens in food.
- The symptoms of an allergic reaction and the steps to take should anaphylaxis or anaphylactic shock occur.

Parents will be expected to make the setting aware of any allergies or intolerances their child has and the actions that need to be taken if a reaction occurs.

A protocol will be established and made accessible to all staff to ensure everyone is aware of a child's allergies and symptoms.

Where it is suspected that a child has an allergy, the setting will encourage the child's parents to seek advice and diagnosis from their doctor.

The setting will ensure children with allergies are not exposed to foods that trigger allergies. Appropriate alternatives will be identified to ensure the child still eats a balanced diet.

All staff will be instructed, where necessary, to ensure they understand how to identify which allergens are present in every meal and snack provided.

All food that is pre-packed for direct sale (PPDS) will have the name of the food and the full ingredients list, with allergens emphasised, e.g. in bold, italics or a different colour, clearly displayed.

All preparation of food containing common allergens, e.g. nuts, will be kept separate from other food preparation.

There will be a set of kitchen utensils that are only for use with the food and drink of the children at risk of allergic reactions. There will also be a set of kitchen utensils with a designated colour. These utensils will be used only for food items that contain bread and wheat related products.

Food items containing nuts, bread and wheat will be stored separately.

Learning activities which involve the use of food will be planned in accordance with children's individual healthcare plans (IHPs), considering any known allergies of the children involved.

Children are not allowed to swap or share their food with other children.

Food provided for children with allergies will be managed in accordance with the Allergen and Anaphylaxis Policy.

Appropriate provision will be made for parental preferences, including cultural and religious food sensitivities, e.g. providing halal and kosher food as appropriate.

8. Food brought in from home

Food that is brought into the setting from home will be expected to comply with this policy and the Packed Lunch Policy.

Food and drink will be appropriately labelled with the child's details and safely stored until needed.

Any food that is not consumed during the day will be sent home with the child.

9. Eating habits

All children will be supported to manage their own personal needs as far as possible, including understanding the importance of healthy food choices.

At mealtimes, fussy eaters will be seated with children that are more adventurous with their food to encourage the adoption of different food preferences.

Children will be regularly exposed to new foods in order to increase their liking for, and consumption of, a variety of new foods (providing these foods meet their specific dietary requirements).

Favourite foods will not be used as a reward to encourage children to eat foods they do not like.

The setting is aware that some children will have allergies or different dietary requirements; this will be considered when encouraging children to try new foods.

Before a child is admitted, the setting will obtain information about any special dietary requirements, preferences and food allergies – this information will be recorded and acted upon as appropriate.

Children will never be forced to finish everything on their plate.

10. Food safety and hygiene

Food will be stored, prepared and presented in a safe and hygienic environment which is adequately equipped to provide healthy meals, snacks and drinks for children.

Children will be taught basic hygiene, such as not eating food that has fallen on the floor and washing their hands before eating and after using the toilet.

11. Communication

Staff will work alongside parents to ensure that children are provided with healthy, balanced and nutritious food in the setting.

Early Years Staff will be responsible for communicating with parents about the setting's approach to food provision and children's food intake across the day, as necessary.

A copy of this policy will be shared with Parents/Carers when their child starts in Nursery or Reception.

Menus will be on display for all parents to see on the website.

12. Meeting the needs of all children

Wherever possible, the setting will endeavour to cater for the cultural and dietary needs of all children in its care.

The setting is aware that children with special dietary requirements may need specific foods excluded or included; however, it will not exclude foods from a child's diet without a valid reason as this may lead to unnecessary restrictions in their diet. In meeting the needs of all children, the setting will consider the following dietary requirements:

- Food allergies
- Food intolerances
- Vegetarianism
- Veganism or eating a plant-based diet
- Pescetarianism
- Religious preferences, for example:
 - Only eating halal foods.
 - Avoiding pork or beef.
 - Keeping kosher.
 - Eating specific foods only on certain days.

The setting will create a safe and inclusive environment for all children to eat, and children with special dietary requirements will be included in mealtimes with other children as far as possible.

A child will only need to eat their meal separately to other children where a risk assessment concludes that a significant risk remains despite adequate training and supervision of meals and snacks times.

Staff will have ongoing discussions with parents about their child's dietary needs and encourage parents to assist the setting by sharing guidance from healthcare professionals.

The setting will seek professional advice for menu planning when needed.

13. Safer eating

The setting will follow robust procedures to ensure that all children eat safely and that risks of choking, allergic reactions, and cross-contamination are minimised.

At least one member of staff holding a full paediatric first aid certificate will always be present in the room when children are eating.

Before a child starts at the setting, information about any special dietary requirements, preferences, food allergies, intolerances, or health needs will be obtained from parents or carers, clearly documented, and shared with all staff involved in food preparation and service.

The setting will work in partnership with parents, carers, and where appropriate, health professionals to create and maintain up-to-date allergy action plans. All staff will be made aware of these plans and will receive guidance on recognising allergy symptoms, understanding the difference between allergies and intolerances, and administering the correct treatment for allergic reactions and anaphylaxis. Staff will remain alert to the possibility of children developing new allergies.

Food will always be prepared following national guidance to reduce the risk of choking, including cutting food into suitable sizes and avoiding high-risk items.

Children will always be within sight and hearing of staff while eating, and staff will sit facing the children where possible to monitor eating, prevent food sharing, and respond quickly to choking or allergic reactions.

Any choking incidents that require intervention will be recorded in detail, shared with parents or carers, and reviewed regularly to identify patterns and implement measures to further reduce risk.

14. Monitoring and review

This policy will be reviewed annually by the Headteacher, EYFS & KS1 Assistant Head and First Aid Lead.

Any changes to this policy will be communicated, by the Headteacher and EYFS & KS1 Assistant Head to all staff members.

The next scheduled review date for this policy is July 2027.
