

# Aintree Davenhill Primary School Primary School

## Administering Medication Policy

July 2026

## Contents:

### Statement of Intent

1. Legal Framework
2. Roles and Responsibilities
3. Training Staff
4. Receiving, Storing and Disposing of Medication
5. Administering Medication
6. Medical Devices
7. IHPs
8. Educational Trips and Visits
9. Medical Emergencies
10. Monitoring and Review

## Statement of Intent

Aintree Davenhill Primary will ensure that pupils with medical conditions receive appropriate care and support at school, in order for them to have full access to education and remain healthy. This includes the safe storage and administration of pupils' medication.

The school is committed to ensuring that parents feel confident that we will provide effective support for their child's medical condition, and make the pupil feel safe whilst at school.

For the purposes of this policy, **"medication"** is defined as any prescribed or over the counter medicine, including devices such as asthma inhalers and adrenaline auto-injectors (AAIs). **"Prescription medication"** is defined as any drug or device prescribed by a doctor. **"Controlled drug"** is defined as a drug around which there are strict legal controls due to the risk of dependence or addiction, e.g. morphine.

## 1. Legal Framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Health and Safety at Work etc. Act 1974
- Equality Act 2010
- Children and Families Act 2014
- DfE 'Supporting children and young people with medical conditions and allergy'
- DfE 'Early years foundation stage (EYFS) statutory framework'
- DfE 'Automated external defibrillators (AEDs): a guide for maintained schools and academies'

This policy operates in conjunction with the following school policies:

- Child Protection and Safeguarding Policy
- Health and Safety Policy
- Early Years Policy
- Supporting Pupils with Medical Conditions Policy
- First Aid Policy
- Records Management Policy
- Allergy Safety Policy
- Educational Visits and School Trips Policy
- Asthma Policy
- Complaints Procedures Policy

## 2. Roles and Responsibilities

The Governing Body is responsible for:

- The implementation of this policy and procedures, and all corresponding procedures.
- Ensuring that this policy, as written, does not discriminate on any grounds, including the protected characteristics as defined by the Equality Act 2010.
- Ensuring that there is a sufficient number of trained staff available within the school to administer medication based upon the school's risk assessments.
- Ensuring the correct level of insurance is in place for the administration of medication.

- Ensuring that members of staff who administer medication to pupils, or help pupils self-administer, are suitably trained and have access to information needed.
- Ensuring that relevant health and social care professionals are consulted in order to guarantee that pupils taking medication are properly supported.
- Managing any complaints or concerns regarding this policy, the support provided to pupils, or the administration of medication in line with the school's Complaints Procedures Policy.

The headteacher is responsible for:

- The day-to-day implementation and management of this policy and relevant procedures.
- Ensuring that appropriate training is undertaken by staff members administering medication.
- Ensuring that staff members understand the local emergency services' cover arrangements and that the correct information is provided for the navigation system.
- Organising another appropriately trained individual to take over the role of administering medication in case of staff absence.
- Ensuring that all necessary risk assessments are carried out regarding the administration of medication, including for school trips and external activities.

All staff are responsible for:

- Adhering to this policy and supporting pupils to do so.
- Carrying out their duties that arise from this policy fairly and consistently.

Parents are responsible for:

- Keeping the school informed about any changes to their child's health.
- Completing an administering medication parental consent form prior to them bringing any medication into school.
- Discussing medication with their child prior to requesting that a staff member administers the medication.

It is both staff members' and pupils' responsibility to understand what action to take during a medical emergency, such as raising the alarm with the school nurse or other members of staff. This may include staff administering medication to the pupil involved.

### 3. Training staff

The headteacher will ensure that a sufficient number of staff are suitably trained in administering medication. All staff will undergo basic training on the administering of medication to ensure that, if exceptional circumstances arise where there is no designated administrator of medication available, pupils can still receive their medication from a trained member of staff. The headteacher will also ensure that a sufficient number of staff have been trained in administering medication in an emergency by a healthcare professional.

Where it is a necessary or vital component of their job role, staff will undertake training on administering medication in line with this policy as part of their new starter induction.

Staff will be advised not to agree to taking on the responsibility of administering medication until they have received appropriate training and can make an informed choice. The school will ensure that, as part of their training, staff members will be informed that they cannot be required to administer medication to pupils, and that this is entirely voluntary, unless the supporting of pupils with medical conditions is central to their role within the school, e.g. the school nurse.

Training will also cover the appropriate procedures and courses of action with regard to the following exceptional situations:

- The timing of the medication's administration is crucial to the health of the child
- Some technical or medical knowledge is required to administer the medication
- Intimate contact with the pupil is necessary

Staff members will be made aware that if they administer medication to a pupil, they take on a legal responsibility to do so correctly; therefore, staff will be encouraged not to administer medication in the above situations if they do not feel comfortable and confident in doing so, even if they have received training.

#### Training for Administering AAls

The school will arrange specialist training for staff on annual. Designated staff members (first aiders) with suitable training and confidence in their ability to use AAls will be appointed to administer this medication. However, all staff have the training to use AAls in an emergency. As part of their training, all staff members will be made aware of:

- How to recognise the signs and symptoms of severe allergic reactions and anaphylaxis.
- Where to find AAls in the case of an emergency.
- How the dosage correlates with the age of the pupil.
- How to respond appropriately to a request for help from another member of staff.
- How to recognise when emergency action is necessary.
- Who the designated staff members for administering AAls are.
- How to administer an AAI safely and effectively in the event that there is a delay in response from the designated staff members.
- How to make appropriate records of allergic reactions.

#### 4. Receiving, Storing and Dsposing of Medication

##### Receiving Prescribed Medication from Parents

The parents of pupils who need medication administered at school will be given an administering medication parental consent form to complete and sign; the signed consent form will be returned to the school and appropriately filed

before staff can administer medication to pupils under the age of 16. A signed copy of the parental consent form will be kept with the pupil's medication, and no medication will be administered if this consent form is not present. Consent obtained from parents will be renewed annually if the medication is still needed.

It is the responsibility of the parent to provide medicine, which is:

Clearly labelled in its original container

Clearly labelled with the child name (i.e. prescriptions only)

Clearly labelled with the child's date of birth

Clearly labelled with the dose

Prescribed by a doctor

Prescription medicines (if agreed by the school) should be received from and returned to a responsible adult only. Medicines should normally be received and returned daily.

Only one member of staff to administer medication at any time to avoid the risk of double dosing. However, a second person is to provide a double check to the administration of medication and initial procedures.

School will administer, where necessary, one dose of medication when they are to be given four times a day.

Non-prescribed medicines will not be given in school, unless prior arrangements from the headteacher.

If a child refuses medication the parent will be informed.

Only one member of staff to administer medication at any time to avoid the risk of double dosing. However, a second person is to provide a double check to the administration of medication and initial procedures.

Current Medical Procedures in School for long term medication:

All school staff have a clear understanding of the procedures on long term medication.

All children with a medical condition at this school have an IHCP, which explains what help they need in an emergency. The IHCP will accompany a pupil should they need to attend hospital. Parental permission will be sought and recorded in the IHCP for sharing the IHCP within emergency care settings.

Current Medical Procedures in School for short term medication:

Non-prescriptive medicines e.g. painkillers, cough syrup, throat lozenges and cough sweets will neither be stored nor administered to pupils in school. In exceptional circumstances, should a child require non-prescriptive medicine or throat lozenges or cough sweets, it is essential that a parent/guardian put this in writing and either he/she or a nominated adult administer the medicine. Non-prescribed medicines should not normally be administered in school, if rare circumstances occur, the parent/guardian should make an appointment with the Headteacher, prior, to discuss this and to gain permission.

No medication is to be given without prior written parental consent.

All medication is to be in the original dispensing container clearly labelled with the name, dosage, and contents. Any medication requiring spoons should be provided by the parent/carer, if one is not provided a disposable spoon MUST be used.

Controlled drugs that have been prescribed for a pupil must be kept securely stored in a non-portable container and only named staff should have access and should be easily accessible in an emergency. A record should be kept of any doses used and the amount of the controlled drug held.

School will administer, where necessary, one dose of medication when they are to be given four times a day.

All parents must be informed that children recovering from short term illness returning to school, but still receiving antibiotics, three times per day, must be given these at home, i.e. before school, after school, and at bedtime. (Separate arrangements may need to be made for children attending after-school clubs.)

If a child refuses medication the parent will be informed.

Staff supervising excursions should be aware of any medical needs and relevant emergency procedures.

All staff receive training in what to do in an emergency and this is refreshed as and when needed. This should be provided by the specialist nurse/school nurse/other suitably qualified healthcare professional and/or the parent. The specialist nurse/school nurse/other suitably qualified healthcare professional will confirm their competence, and this school keeps an up-to-date record of all training undertaken and by whom.

A number of staff have been trained to administer the emergency use of Adrenaline Auto-Injector pens. AAls and medicines for the treatment of anaphylactic shock are kept in a secure place in the stockroom of the child's first aid grab bag in a box clearly labelled with the child's name.

This school makes sure that all staff providing support to a pupil have received suitable training and ongoing support, to make sure that they have confidence to provide the necessary support and that they fulfil the requirements set out in the pupil's IHCP.

The school will store a reasonable quantity of medication, e.g. a maximum of four weeks' supply at any one time. Aspirin will not be administered unless the school has evidence that a doctor has prescribed it.

Parents will be advised to keep medication provided to the school in the original packaging, complete with instructions, as far as possible, particularly for liquid medications where transfer from the original bottle would result in the loss of some of the medication on the inside of the bottle. This does not apply to insulin, which can be stored in an insulin pen.

### Storing Pupils' Medication

The school will ensure that all medications are kept appropriately, according to the product instructions, and are securely stored. Medication that may be required in emergency circumstances, e.g. asthma inhalers and AAls, will be stored in the class green grab bag, to be readily accessible to pupils who may need it and can self-administer, and staff members who will need to administer them in emergency situations. All controlled medication will be stored in a place inaccessible to pupils, e.g. a locked cupboard.

The school will ensure that pupils know where their medication is at all times and are able to access them immediately, e.g. by ensuring that the identities of any key holders to the storage facilities are known by these pupils.

Medication will be:

- Stored safely and in accordance with the manufacturer's instructions.
- Stored in a location that is known to pupils at all times and is immediately accessible, including when outside the premises.
- Carried by pupils for self-administration if deemed suitable by a healthcare professional or required due to their condition.

Medicines and devices which may be required in an emergency situation will always be readily available. They will never be locked away.

Medication is kept in the class green grab bags.

### Disposing of Pupils' Medication

The school will not store surplus or out-of-date medication. Where medication and/or its containers need to be returned to the pupils' doctor or pharmacist, parents will be asked to collect these for this purpose.

Needles and other sharps will be disposed of safely and securely, e.g. using a sharps disposal box.

The school will ensure that medicines are disposed of in accordance with relevant waste and environmental legislation. Medicines will be separated from general waste and disposed of via appropriate routes:

- Non-prescription medicines may be returned to a pharmacy.
- Prescription medicines will be disposed of via licensed waste facilities.
- Controlled drugs will be rendered irretrievable before disposal.

Medicines awaiting disposal will be stored securely in a tamper-proof container.

The school will comply with relevant legislation including the Environmental Protection Act 1990, Controlled Waste Regulations 2012, and Hazardous Waste Regulations 2005.

## 5. Administering medication

Medication will only be administered at school if it would be detrimental to the pupil not to do so and it has been prescribed by a doctor. Only suitably qualified members of staff will administer controlled drugs. The administration of controlled drugs is permitted under the Misuse of Drugs Regulations 2001 where they have been prescribed for a pupil. Staff will check the expiry date and maximum dosage of the medication being administered to the pupil each time it is administered, as well as when the previous dose was taken.

Medication will be administered in a private, comfortable environment and as far as possible, in the same room as the medication is stored. The room will be equipped with the following provisions:

- Arrangements for increased privacy where intimate contact is necessary
- Facilities to enable staff members to wash their hands before and after administering medication, and to clean any equipment before and after use if necessary
- Available PPE for use where necessary

Pupils will not be prevented from accessing and taking their prescribed or non-prescribed medication where this is necessary for their health and wellbeing.

Before administering medication, the responsible member of staff should check:

- The pupil's identity.
- That the school possesses written consent from a parent.

- That the medication name, dosage and instructions for use match the details on the consent form.
- That the name on the medication label is the name of the pupil being given the medication.
- That the medication to be given is within its expiry date.
- That the pupil has not already been given the medication within the accepted frequency of dosage.

Any member of staff may be asked to administer medication; however, no member of staff will be required to do so unless this forms part of their role.

If there are any concerns surrounding giving medication to a pupil, the medication will not be administered and the school will consult with the pupil's parent or a healthcare professional, documenting any action taken.

If a pupil cannot receive medication in the method supplied, e.g. a capsule cannot be swallowed, written instructions on how to administer the medication must be provided by the pupil's parent, following advice from a healthcare professional.

Where appropriate, pupils will be encouraged to self-administer under the supervision of a staff member, provided that parental consent for this has been obtained. If a pupil refuses to take their medication, staff will not force them to do so but will follow the procedure agreed upon in their IHPs, and parents will be informed so that alternative options can be considered.

The school will not be held responsible for any side effects that occur when medication is taken correctly.

Written records will be kept of all medication administered to pupils, including the date and time that medication was administered and the name of the staff member responsible. Records will be stored in accordance with the Records Management Policy.

### Non-prescription Medicines

The school is aware that pupils may, at some point, suffer from minor illnesses and ailments of a short-term nature, and that, in these circumstances, health professionals are likely to advise parents to purchase over-the-counter medicines, for example, paracetamol and antihistamines.

The school will work on the premise that parents have the prime responsibility for their child's health and should provide schools and settings with detailed information about their child's medical condition as and when any illness or ailment arises.

The school will permit the administration of non-prescription medication either by staff if the medication has a 'Care at the Chemist' label. Parents can also attend school to administer the medication.

If a pupil is deemed too unwell to be in school, they will be advised to stay at home or parents will be contacted and asked to take them home.

When making arrangements for the administration of non-prescription medicines the school will exercise the same level of care and caution, following the same processes, protocols and procedures as those in place for the administration of prescription medicines.

The school will also ensure that the following requirements are met when agreeing to administer non-prescription medicines.

- Non-prescription medicines will not be administered for longer than is recommended. For example, most pain relief medicines, such as ibuprofen and paracetamol, will be recommended for three days use before medical advice should be sought. Aspirin will not be administered unless prescribed.
- Parents will be asked to bring the medicine in, to enable the appropriate paperwork to be signed by the parent and for a check to be made of the medication details.
- Non-prescription medicines must be supplied in their original container with a 'Care at the Chemist' label, have instructions for administration, dosage and storage, and be in date. The name of the child can be written on the container by an adult if this helps with identification.
- Only authorised staff who are sufficiently trained will be able to administer non-prescription medicines.

### Paracetamol

The school is aware that paracetamol is a common painkiller that is often used by adults and children to treat headaches, stomach ache, ear ache, cold symptoms, and to bring down a high temperature; however, it also understands that it can be dangerous if appropriate guidelines are not followed and recommended dosages are exceeded.

The school is aware that paracetamol for children is available as a syrup from the age of 2 months; and tablets (including soluble tablets) from the age of 6 years, both of which come in a range of strengths.

The school understands that children need to take a lower dose than adults, depending on their age and sometimes, weight. The school will ensure that authorised staff are fully trained and aware of the [NHS advice](#) on how and when to give paracetamol to children, as well as the recommended dosages and strength.

Staff will always check instructions carefully every time they administer any medicine, whether prescribed or not, including paracetamol.

The school will ensure that they have sufficient members of staff who are appropriately trained to manage medicines and health needs as part of their duties.

## 6. Medical Devices

### Asthma inhalers

The school will allow pupils who are capable of carrying their own inhalers to do so, provided that parental consent for this has been obtained. The school will ensure that spare inhalers for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working.

### AAIs

The school will allow pupils who are capable of carrying their own AAI to do so, provided that parental consent for this has been obtained. The school will ensure that spare AAI for pupils are kept safe and secure in preparation for the event that the original is misplaced, unavailable or not working.

Spare AAls are not located more than five minutes away from where they may be required. The emergency AAls can be found at the following location:

- **Outside the school office**

There will be a stock of AAls, which are replenished when used. The school will ensure that risk assessments regarding the use and storage of AAls on the premises are conducted and up to date.

Medical authorisation and parental consent will be obtained from all pupils believed to be at risk of anaphylaxis for the use of spare AAls in emergency situations. Where consent and authorisation have been obtained, this will be recorded in the pupil's IHP.

Pupils' and spare AAls will be obtained, stored and administered in line with the school's Allergen and Anaphylaxis Policy.

## 7. IHPs

For pupils with chronic or long-term conditions and disabilities, an IHP will be developed in liaison with the pupil, their parent, the headteacher, the SENCO and any relevant medical professionals. When deciding what information should be recorded on an IHP, the following will be considered:

- The medical condition and its triggers, signs, symptoms and treatments
- The pupil's resulting needs, such as medication, including the correct dosage and possible side effects, medical equipment, and dietary requirements
- The specific support needed for the pupil's educational, social and emotional needs
- The level of support needed and whether the pupil will be able to take responsibility for their own health needs
- The type of provision and training that is required, including whether staff can be expected to fulfil the support necessary as part of their role
- Which staff members need to be aware of the pupil's condition
- Arrangements for receiving parental consent to administer medication
- Separate arrangements which may be required for out-of-school trips and external activities
- Which staff member can fulfil the role of being a designated, entrusted individual to whom confidentiality issues are raised
- What to do in an emergency, including whom to contact and contingency arrangements
- What is defined as an emergency, including the signs and symptoms that staff members should look out for

The Governing Body will ensure that IHPs are reviewed at least annually. IHPs will be routinely monitored throughout the year by a designated staff member.

## 8. Educational Trips and Visits

In the event of educational trips and visits which involve leaving the school premises, medication and medical devices will continue to be readily available to staff and pupils. This may include pupils carrying their medication themselves, where possible and appropriate, e.g. for asthma inhalers.

If the medication is of a type that should not be carried by pupils, e.g. capsules, or if pupils are very young or have complex needs that mean they cannot self-administer, the medication will be carried by a designated staff member for the duration of the trip or activity.

There will be at least one staff member who is trained to administer medication on every out-of-school trip or visit which pupils with medical conditions will attend. Staff members will ensure that they are aware of any pupils who will need medication administered during the trip or visit, and will ensure that they know the correct procedure, e.g. timing and dosage, for administering their medication.

If the out-of-school trip or visit will be over an extended period of time, e.g. an overnight stay, a record will be kept of the frequency at which pupils need to take their medication, and any other information that may be relevant. This record will be kept by a designated trained staff member who is present on the trip and can manage the administration of medication.

All staff members, volunteers and other adults present on out-of-school trips and visits will be made aware of the actions to take in a medical emergency related to the specific medical needs and conditions of the pupil, e.g. what to do if an epileptic pupil has a seizure.

## 9. Medical Emergencies

Medical emergencies will be handled in line with the First Aid Policy.

For all emergency medication stored by the school, the school will ensure it is readily accessible to staff and the pupil who requires it and is not locked away. For all emergency medication kept in the possession of a pupil, e.g. AAls, the school will ensure that pupils are told to keep the appropriate instructions with the medication at all times.

## 10. Monitoring and Review

This policy will be reviewed annually by the headteacher. The next scheduled review is July 2027.

Records of medication administered on the school premises, or on school trips and visits, will be monitored, and the information recorded will be used to improve school procedures.

Staff members trained in administering medication will routinely recommend any improvements to the procedure. The school will also seek advice from any relevant healthcare professionals as deemed necessary. Any changes made to this policy will be communicated to the relevant stakeholders, including pupils whose medication is stored at school and their parents.
